PRODUCT DESCRIPTION

Designer: Le Corbusier

Nemo Lighting Borne Beton Petite LED Table Lamp

The Nemo Borne Beton Petite table lamp is a unique item that brings together the simple subtlety of light and the sturdy solid nature of concrete. The curved edges and fluid-like motion created by the design are in juxtaposition with the set concrete. This contrast forms intrigue and softens the design's hardy exterior. Each lamp is handcrafted and sculpted individually to make sure each and every lamp is perfectly formed.

The integrated LED light source appears to be set within the concrete structure and is embraced by the crest of the concrete wave. The slit of light that appears adds warmth and softness to the industrial form. This industrial style is a popular way of simplifying life and creating a minimalist aesthetic within a home or commercial space. With the ability to dim the light, the Borne Beton Petite table lamp can adjust to the perfect brightness to provide a warming ambience for your space. Place this Nemo LED table lamp as a decorative item on a shelf or as an eye-catching feature on a side table.
