PRODUCT DESCRIPTION

Designer: Says Who

Kettle To Go LED Multi-functional Lamp by Nordlux

The Kettle To Go is a versatile and useful light, with endless possibilities at your disposal. The multi-use lamp is made from plastic, with an IP rating of 65 so you can use it outside and inside. The shade has a bottom that allows for the application of an accessory, transforming from a portable light into a table lamp, floor lamp, or garden spike.

The Kettle To Go is available in two sizes, Kettle 22 and Kettle 36, and can be bought as a portable/suspension lamp, garden spike, table lamp or floor lamp. The portable/suspension comes with a cord so you can beautifully hang the portable light from terraces or trees. The garden spike comes with a 51cm high spike for application into the ground and the table and floor lamps come with a tripod in a black metal or wood finish.

The Kettle To Go light features a dimmer switch on the body with three light intensities and colour temperatures so you can have both functional and cosy lighting. The lamp is also rechargeable and lasts for five hours if used on the brightest setting and fully charged. Use all around your home and garden for a stylish and handy light!

Your purchase includes a Kettle To Go and an accessory if choosing a garden spike, table lamp or floor lamp. To purchase just an accessory for your Kettle To Go please contact us.
