PRODUCT DESCRIPTION

Designer: PEDERJESSEN

Mater Ray Pendant Light

This functional yet minimalist design by Danish design studio PEDERJESSEN combines steel and oak to create these ingenious lighting fixtures. The Ray shade is a wooden globe, that houses the light source, placed inside a steel dome shade. By using magnets, the two shades connect and can be easily adjusted to direct the ray of light wherever you need it. This would make this pendant ideal as a task light for above workspaces or countertops. The contrast of the steel and oak create a soft appearance that would bring a touch of Scandinavian design to anywhere in your home or commercial space.

Available in two sizes and two colour finishes, the Ray pendant by Mater is a simple yet stunning design that can morph itself around your task or your interior.
