PRODUCT DESCRIPTION

Designer: PEDERJESSEN

Mater Ray Wall Light

The Mater Ray wall light is a functional and simple wall light that brings together the beauty and raw nature of the natural oak and steel. The combination of these materials, oak and steel, demonstrates the importance of materiality within the Scandinavian design.

Available in black and white, this Mater wall light is a clear example of nordic style and functionality. The oak globe-like shade uses magnets to connect to the inside of the steel dome. This allows you to manoeuvre and direct the light to wherever it is needed. Ideal for a workspace or reading nook where a practical yet elegant light is needed.

The Ray Wall light should be installed near a plug, as it comes with a 2m cable and plug. Alternatively, the Ray can be hard-wired to the wall by a qualified electrician. The light can be switched on and off by the integrated switch.
