PRODUCT DESCRIPTION

Designer: Michele Groppi

Reflex LED Wall Light by Davide Groppi

Designed by Michele Groppi, the Reflex wall light is an innovative and magical lighting solution. The wall lamp is made using a mirror which reflects the surroundings to produce a deceptive illusion as the light seemingly disappears into the background. The integrated LED light source then shines upwards, creating an atmospheric glow in any interior.

The Reflex wall lamp comes in either a 2700K (warmest white) or 3000K (warm white) colour temperature and has dimming capabilities so you can create the perfect ambience in your space. This wall light can be used in both public and private spaces and will create beautiful and mesmerising perceptions in the room.

The Reflex LED wall lamp is also available in a Davide Groppi **Endless** version. Endless is an adhesive tape that can conduct electricity to create countless and easy configurations on walls and ceilings. Please [contact us](#) for more information and prices.
