PRODUCT DESCRIPTION

Designer: Dimitri Bähler

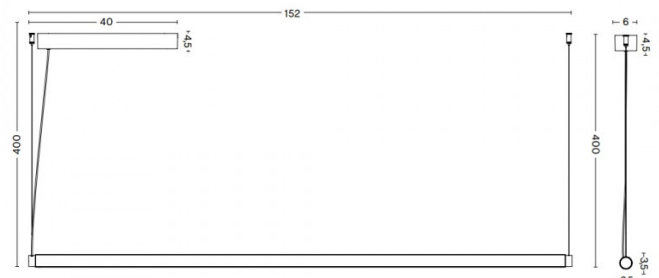

HAY Factor Linear LED Suspension Light

The Factor Linear suspension lamp was designed by Swiss designer Dimitri Bähler and enables users to create a personalised lit environment with either direct or indirect light. This tubular design contains a rotatable inner core that houses a dimmable integrated LED strip. This design allows the user to rotate the inner core 360 degrees for infinite movement. By having this level of movement and adjustability, the Factor Linear suspension gives the user both direct and indirect light.

This suspension light gives you multiple options for your space. Available in two minimalist finishes, a raw aluminium and a soft black finish, both of which bring a simple and understated touch to your space. The HAY Factor Linear also comes as either a directional or diffused version. The directional option is ideal for cooler, more focused light that is well suited to offices, public buildings and other professional areas requiring a more task-oriented lighting solution. Whereas the diffused version can be used to create an ambience above a dining table, over a kitchen island or in a home office.

PRODUCT SPECIFICATION

Light Source:	Diffused: 38W, 2700K, 1800 Lumens Directional: 38W, 3500K, 2900 Lumens
IP Code:	20
