PRODUCT DESCRIPTION

Designer: Anne Boysen

Louis Poulsen Moonsetter LED Floor Lamp

The Moonsetter is a sculptural floor lamp designed by Anne Boysen, an architect and designer, she works in the intersection between art, design, and architecture. This can clearly be seen within the simple design, clean lines, and timeless feel of the Moonsetter LED floor lamp. This design was instantly recognised after Anne Boysen used the Moonsetter to win the Next Danish Design Classic competition. The design was described as 'based on basic geometric shapes with the circle, square and cylinder merged in a unique and artistic configuration'.

This sculpture takes center stage in any room and almost acts as a piece of art as its central disc rotates 360 degrees to reveal its contrasting finishes on each side. Inviting you to interact, the Moonsetters rotating disc features a white side and a reflective side. This feature allows you to play around and decide how the light should be reflected into your space. The chrome-plated aluminium delicately reveals the LED light source that is elegantly submerged into the frame of the floor lamp. As the disc is tilted, this light source can be directed and diffused as you please. This light can also be easily controlled and dimmed using the cylindrical foot switch that fades the light in and out with a step-less dimming system.

This innovative artistic design is unique in its expression as each and every one of these stunning floor lamps is engraved with the edition number 1-100. This adds a level of quality and uniqueness to the whole design. Place this floor lamp in your hallway for an impactful entrance to your home or place it in a calming bedroom or living space for the perfect lighting solution. Both functional and beautiful, the Moonsetter will add an artistic touch to wherever it is placed.

PRODUCT SPECIFICATION

Light Source:	19W, 3500K
IP Code:	20
Dimming:	Integrated dimmer included on the product.
Dimensions:	Height: 60cm Width: 60cm Depth: 30cm Cable Length: 250cm
