PRODUCT DESCRIPTION

Designer: Jumbo Design Studio

Petite Friture Neotenic LED Table Lamp

The Petite Friture Neotenic LED Table Lamp was designed by Jumbo, a New York-based studio founded by old friends Justin Donnelly and Monling Lee. The pair always seek to create designs that embody reductivism and whimsy, something that can definitely be seen in this table lamp. The Neotenic is defined by curved, rounded shapes, emulating the comforting aesthetics of childhood and adding a playful touch to your interior.

Neotenic is made from ceramic and uses a complex and intricate process to achieve its curved effect. An accomplishment in both conception and manufacturing, this table lamp is a beautiful piece that can be used in a wide variety of settings. The Neotenic comes in a vanilla, cherry, green or platinum colour finish and in a small or large size to suit your design needs.
