PRODUCT DESCRIPTION

Designer: Guglielmo Poletti

Flos To-Tie Table Lamp

Available in three sizes to choose from, the To-Tie is Guglielmo Poletti's first design for Flos. Poletti has created a contemporary lighting solution that is stripped down to the bare minimum, and its name is drawn from the idea of fastening something. To-Tie is crafted from borosilicate glass for the body and aluminium for its handle, which also houses the LED source. The Flos To-Tie becomes a decorative piece even when not in use. With a minimalistic form, this lamp can be carried around by the bar, easily changing its position.

The Flos To-Tie offers T1, T2 and T3 sizes with an anodised black handle. The dimmer, located on the lamp's cable, allows you to easily adjust the light intensity and create the perfect ambience for your space. As with other Flos products, part of the Flos For Planet initiative, no glue was used to assemble the product, and therefore the To-Tie can be separated, and any parts easily replaced as well as recycled when needed.
