PRODUCT DESCRIPTION

Designer: Alf Svensson

Audo Copenhagen Collector Wall Light

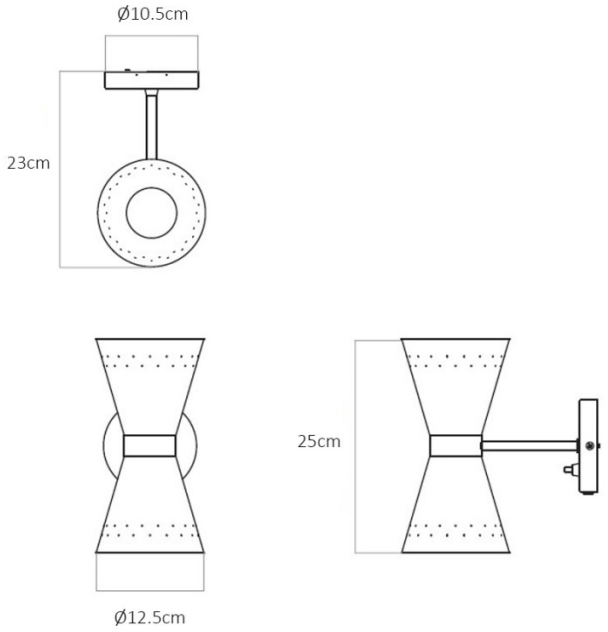

A mid-century design, as envisioned by Alf Svensson, the Collector Wall Light is now available by Audo Copenhagen. Both functional and decorative, the Collector features brass and creme details, allowing the design to suit a variety of classic and contemporary spaces.

The Collector Wall Light harnesses two shades, emitting a downward and upwards light for a more even illumination, while the small perforations on the shade push light outwards, creating a game of light and shadows. Its name is a reference to the collectability of these lights, which describes mid-century lighting design at its finest.

The Collector Wall Light can either be installed directly onto the wall, keeping the cable and plug, or installed into the mains electricity by removing the cable and plug.
