PRODUCT DESCRIPTION

Designer: Carlotta de Bevilacqua

Artemide Architectural Vector LED Semi Recessed Spotlights

The Artemide Architectural Vector LED Semi Recessed Spotlights is a compact LED spotlight designed to provide precise accent lighting from a neat, semi recessed ceiling detail. The cylindrical head sits partially within the ceiling, allowing the fitting to read as a clean circle with the spotlight emerging only where it is needed. Once installed, the head can rotate by 360 degrees and tilt by up to 90 degrees, so light can be directed accurately onto displays, walls or surfaces.

Available with a choice of narrow to medium beam angles and colour temperatures from warm 2700K through to 4000K, Vector Semi Recessed can be used for both focused highlighting and more general background lighting. The integrated LED light source delivers good lumen output with CRI 90 for faithful colour rendering, making it well suited to retail, gallery and hospitality applications as well as high specification residential interiors.

The aluminium body is offered in black, white and brushed metallic finishes to complement a wide range of schemes or coordinate with other fixtures in the Vector family. A remote driver powers the fitting and is available in undimmable or DALI dimmable versions, allowing specifiers to integrate Vector Semi Recessed into more complex control systems where scenes and levels need to be managed centrally.

As the official UK distributor, we can support you with layouts, accessories and drivers. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

Light Source: Available in 2700K, 3000K, or 4000K colour temperature. Wattage and lumen output vary by luminaire type.

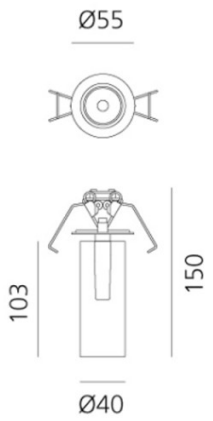

IP Code: 20
