PRODUCT DESCRIPTION

Designer: Daniel Rybakken

Luceplan Counterbalance LED Spotlight

The LED Spotlight is the latest addition to the Luceplan Counterbalance collection. Designed by Daniel Rybakken it is easy to fit and boasts a timeless and elegant design, whilst remaining versatile - this product can be used as either a wall or a ceiling light. Although it does not host the same frame as other Counterbalance models, specifically the long arm and balancing system of the original wall model, the Spotlight still conserves the characteristic directional reflector cap.

Fitted with energy efficient LEDs, the Counterbalance Spotlight is both powerful and economical. The lightweight frame makes adjustment effortless, the aluminium head of the light can be rotated to create a warm direct light for your space, making the Counterbalance Spotlight a practical yet unobtrusive task light. The head also includes a three step dimmer switch that allows the light intensity to be regulated in three stages: 0%, 50%, 100%. It can be used to optimise small spaces such as corridors or small rooms with low ceilings.
