PRODUCT DESCRIPTION

Designer: Odin Visser

Moooi NomNom Light LED Pendant

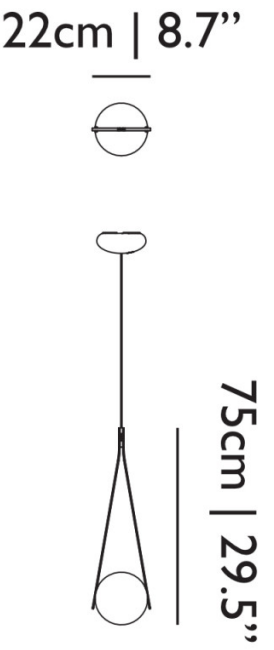

Moooi's NomNom light is a modern and playful installation by Dutch designer Odin Visser. Two straight-lined structures hold a glowing glass ball, creating the illusion of two chopsticks holding something delicious. Distinguished and sophisticated, the NomNom makes you hungry for more. Display as a stand-alone product or have several in a bundle or row for an enticing and captivating design staple. Inspired by the irresistible aspect of good food, the NomNom is perfect for hanging above a dining room table or in multiples in a contemporary restaurant. Mix and match different colourways to create a bright and dynamic installation.

The integrated LED emits a warm white colour temperature, creating a cosy and inviting illumination. The frosted glass globe allows light to be spread evenly in all directions. Available in 6 colourways: Nori, Wasabi, Ginger, Blossom, Ruby, and Indigo, there's a NomNom to match any colour scheme.

Compatible with the Moooi wireless dimming switch (purchased separately), enabling you to have full control through a Bluetooth-enabled dimming device. Please **contact us** for more information.
