### PRODUCT DESCRIPTION

**Designer:** Kasper Friis Kjeldgaard

### Fritz Hansen Oonline LED Pendant

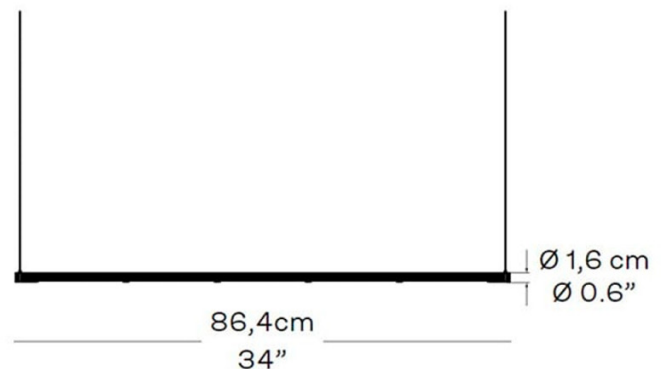

The Fritz Hansen Oonline LED Pendant was designed by Kasper Friis Kjeldgaard and harbours a modern and minimalistic design. With three different finish options, it can blend easily into almost any interior, whilst standing out at the same time. The Oonline is fitted with long-lasting LED technology and can be rotated 360 degrees, offering either direct downward or indirect upward lighting, depending on how you decide to display it. This personalisation assists you in optimising your space to fit your needs, as does its dimming abilities.

The Oonline makes a perfect task light or ambient light. For this reason, this elegant light can be hung in the kitchen, above a desk, over your dining table or even in a bedroom or library. In case of repair and disposal, the pendant can be disassembled into parts; upon disposal, all parts can be recycled.

**You can connect up to 3 Oonline pendant lights in a row with connectors, which can be purchased separately. Each lamp must be installed as a standalone, as the connector does not transfer electricity. The Oonline is also available in a Steel finish, please [contact us](#) for further information and pricing**
