PRODUCT DESCRIPTION

Designer: Maria Berntsen

Design For The People Angle E27 Pendant

Designed by Maria Bernesten for Design For The People, the Angle E27 Pendant is an innovative addition to the lighting world. The real selling point of this pendant is the fact you are able to personalise the direction of your light via a magnetised chord. The minimalistic shade is easy to manoeuvre in order to personalise your environment and illuminate the areas of your room that require it most.

Angle E27 is a contemporary design with an industrial edge to it. The light output creates a beautiful expression of light and can be used as both overall lighting or as a task light, depending on how you decide to display the shade. This lamp looks perfect when hung individually, but also creates an exquisite feature in your space when grouped together and suspended at different heights - especially when all of the pendants are angled at different directions.
