PRODUCT DESCRIPTION

Designer: Maria Berntsen

Design For The People Angle GU10 Wall Light

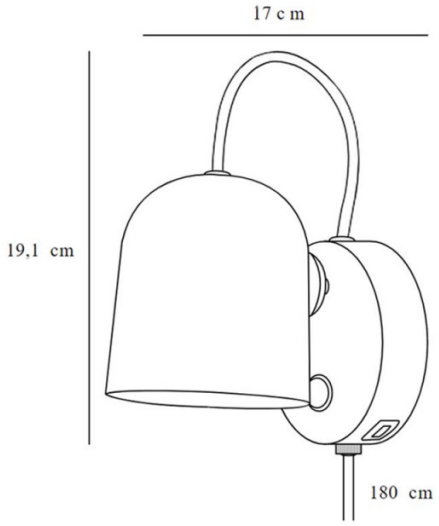

The minimalistic Angle Wall Light was designed by Maria Bernsten for Design For The People and makes a perfect bedside lamp thanks to the soft light output and adjustable shade. The shade is attached by a magnet making it incredibly easy for you to adjust the light direction to suit your personal needs, it provides an excellent direct or indirect light. The matte finish and monochromatic tones ensures that this light can make itself at home in almost any interior décor style.

The Angle GU10 Wall Light provides more than just exceptional light. The wall base includes an integrated switch for ease of use and even harbours a built in USB port, meaning you can charge your phone or other devices whilst the light is in use.

This lamp truly shines next to your bed, by your sofa in your living area or even in areas of your home where you get ready such as a dressing room or bathroom. (this wall light has an IP20 certification, so whilst it can make an excellent addition to your bathroom please keep it a safe distance from water sources. See our information on bathroom zones **here**.)
