## PRODUCT DESCRIPTION

**Designer:** Inga Sempé

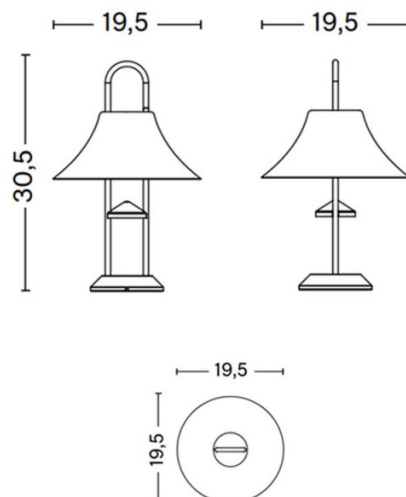

## HAY Mousqueton Portable LED Lamp

The Mousqueton Portable LED Lamp was designed by Inga Sempé and provides functional lighting with a stripped back and durable design, the IP44 certification means the HAY Mousqueton is ideal for both indoor and outdoor use. The contrast of the sleek metal frame and the bold colours of the shades ensures that Mousqueton makes a statement. This colourful design can be used as a table lamp or can even utilised as a lantern, the multipurpose hook fitted on the top of the shade enables users to hang the lamp in your space for a more creative and unique lighting solution.

Although a minimalistic design, the Mousqueton carries a lot of character, and technical abilities. The LED light source illuminates upwards into the shade and is reflected back downwards, emitting a warm circular glow onto the surface it stands upon. The integrated LED light source helps to ensure a longer lifespan than traditional lighting, the LED guarantees at least 25,000 hours of use. An integrated dimmer is hidden underneath the shade of the HAY Mousqueton Portable, granting you the ability to personalise the light output and the ambience of your environment. The touch dimmer grants you three options for light output. This portable LED Lamp provides a minimum 10 hours of usage before the battery requires recharging via the USB-C wire that is included.

## PRODUCT SPECIFICATION

**Light Source:** 3W, 2550K, 157 Lumen  
**IP Code:** 44  
**Dimming:** Integrated dimmer on the product.  
**Dimensions:** Height: 30.5cm
