PRODUCT DESCRIPTION

Designer: Joana Bover

Bover Atticus LED Bollard

The Bover Atticus LED Bollard was designed by Joana Bover, to decorate outdoor spaces with warm ambient lighting. This outdoor lamp flawlessly complements the rest of the Atticus family with clear references to the brand's Mediterranean personality, and can be placed in a range of settings depending on the size you choose.

The shade of this natural design is curated from recyclable and non toxic synthetic fibres, with a sturdy base made from stainless steel. The light source is filtered twice, once through an internal Polyethylene diffuser and secondly through the woven basket shade. This creates a gorgeous warm and atmospheric light output which can also be personalised via Triac dimming. The Atticus LED Outdoor Bollard is a beautiful addition to both residential and commercial environments, but really stands out in private gardens.
