PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Roc LED Ceiling / Wall Light

The Marset Roc LED Ceiling / Wall Light blends sculptural texture with soft illumination. Designed by Joan Gaspar, this family of compact luminaires features a pressed glass diffuser with organic curves that gently obscure the integrated LED source. Whether wall-mounted or ceiling-mounted, each fixture emits a warm, ambient glow that softens architectural spaces without overwhelming them. The Roc lights include an internal filter to reduce glare when wall-mounted, which can be removed when installed on the ceiling for a broader glow.

Available in three sizes, Roc Mini, Roc, and Roc Plus, and finished in either Black or White, the Roc collection offers flexibility in scale and placement. The Mini can also be recessed into walls or ceilings using an accessory (not included). All versions are IP65 rated for outdoor or bathroom use and are dimmable, with optional DALI compatibility. With its textured surface and architectural silhouette, Roc is an elegant solution for entrances, corridors, stairwells, outdoor façades, and beyond.

Please note the Roc Mini comes with a separate power supply that will need to be housed in the ceiling / wall.

The Roc can also be supplied with Dali dimming upon request. Please [contact us](#) for more information.
