## PRODUCT DESCRIPTION

**Designer:** JF Sevilla

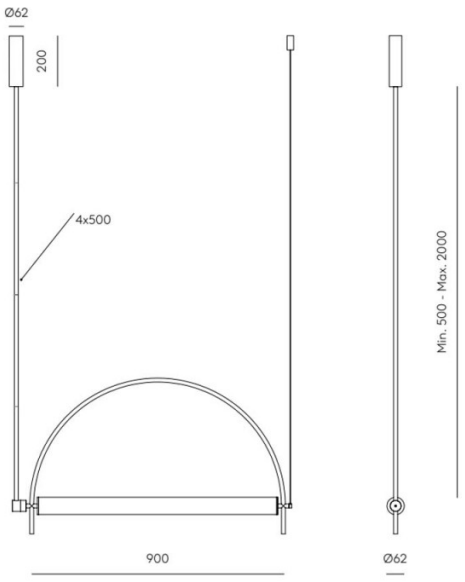

### Aromas Del Campo Arc LED Suspension

Arc Suspension by Aromas Del Campo gets its name from the arch structure and is a lighting solution which successfully plays with geometry, resulting in an extremely elegant and unique design. The arch-shaped structure is available in either black or matte gold and is attached to a tubular light diffuser, concealing an LED light source and projecting an even light emission. The arch can be manoeuvred to reach either upwards or downwards and is the perfect way to add a unique touch to your space.

The Aromas Arc Suspension is height adjustable by means of 4 fixed bars, each measuring 50cm. The minimum suspension height for this light is 50cm, whilst the maximum is 200cm - making it easy to adapt to your environment. Arc was specifically designed with large spaces in mind and makes a beautiful addition to buildings in the hospitality sector, as well as contemporary workspaces. The Arc can be displayed individually or even grouped together, with the arch at different angles, to resemble a wave.

## PRODUCT SPECIFICATION

| | |
