PRODUCT DESCRIPTION

Designer: Martín Azúa

Vibia Dots Outdoor LED Floor Lamp

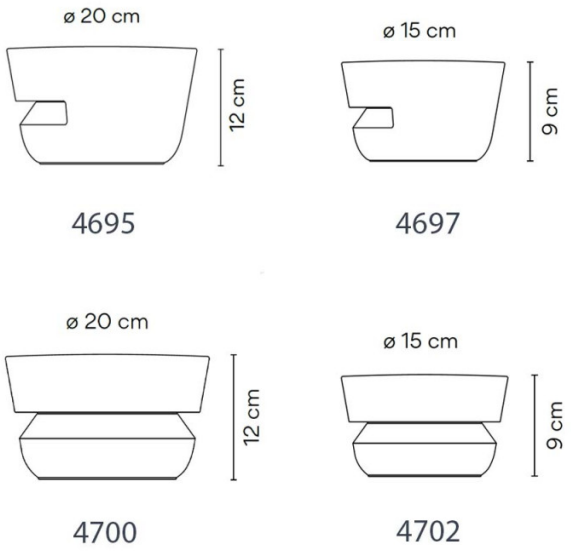

Utilising natural colours, and resembling stones in your exterior areas, the Vibia Dots Outdoor Lights are the perfect solution for illuminating your shrubbery and decking. Each Dots Outdoor Floor Lamp boasts a rounded body with an opening that emits the hidden LED light source, creating an ambient light. This opening is available as either a full halo, which produces an even emission of the light the whole way around the lamp, or a half halo which emits a more directional illumination on one half of the lamp.

The half halo allows you to experiment with the direction of light, it is a perfect lighting solution for brightening up garden paths or walkways. Whilst the full halo is a contemporary way to illuminate flowerbeds and shrubbery in darker areas of your exterior space. The Dots Outdoor LED Lights can be installed individually, or grouped together to create an artistic lighting configuration. Combining different Vibia Dots lights creates an interesting installation, with varying beams of light appearing from multiple directions.

Vibia Dots Outdoor is also available with a dimmable light source. **Contact us** for more information and pricing.
