PRODUCT DESCRIPTION

Designer: Foster and Partners

Artemide Ixa LED Table Lamp

The Artemide Ixa Table Lamp is the definition of functional and sustainable design, allowing you to bring the light to where it is most needed in the room. Inspired by Alexander Calder's sculptures and designed by Foster + Partners, who declare a profound approach to sustainable design, the Ixa LED Table Lamp consists of an adjustable head, metal rods and a counterweight. Providing you with vast amounts of flexibility, the Ixa also boasts a detachable lamp head - this light source is only attached by a magnet and can be easily rotated to direct the light emission in any desired direction.

The Ixa Table Lamp is a slender and contemporary light which is a beautiful example of functional and sustainable design. Ixa is a perfect addition to your workspace, or on a side table in living areas and even bedrooms. It can also make a huge impact in commercial settings, such as spaces which require ambient or decorative lighting.
