PRODUCT DESCRIPTION

Designer: Carlotta de Bevilacqua

Artemide Architectural Antarktikos LED Outdoor Light

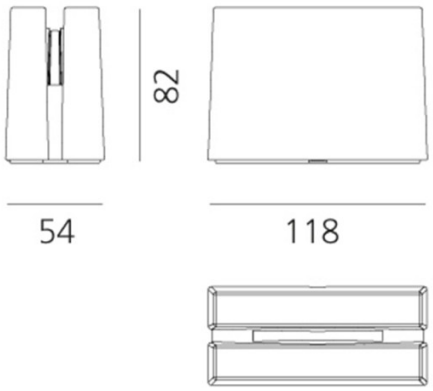

Antarktikos is a compact architectural unit that creates a crisp 360 degree light profile from a single LED. The patented optic produces a blade of light with very low glare and minimal spill, ideal for highlighting facades, entrances and paths. The fixture can be mounted on the wall, ceiling or floor to suit the layout.

Select the white 3000K version for clean architectural emphasis or the RGB version for colour. Drivers are supplied separately and define dimming and control, including Push and DALI options on white light. The housing is suitable for outdoor use and rated IK06 for impact, which supports durable specification across residential and commercial projects.

As the official UK distributor, we can support you with the Artemide configurator and specification. Contact us at artemide@davidvillagelighting.co.uk.
