PRODUCT DESCRIPTION

Designer: BIG

Artemide Vine LED Table Lamp

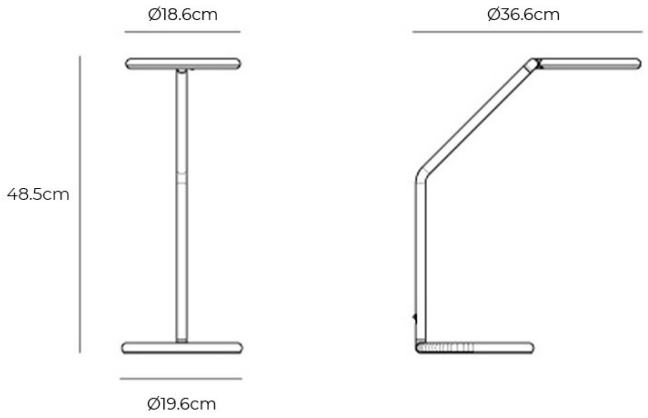

The Artemide Vine LED Table Lamp allows users to define their own light through the adjustability of the body. It consists of only two joints, resulting in a minimalistic presence creating a perfect balance among different materials, weights, precision of movement and functionality. The Vine Table Lamp is a beautiful example of how Artemide has leant into contemporary advancements; the technological complexity is perfectly encapsulated in a simple form.

The uninterrupted line created by Vine plays the role of base, stem, and diffuser. Measuring just 1.6cm in diameter, the jointed black tube houses all of the electronic and mechanical elements without taking up a vast amount of space on your surface. The head of this silhouette is fitted with the LED light source that is evenly diffused and dispersed onto your chosen area.

The Artemide Vine Table Lamp is also available with a fixed base. Contact Us for more information and pricing.
