Marset Plaff-On! LED Pendant

Marset Plaff-on! LED Pendant is an IP65 pendant light by Joan Gaspar, developed from the wider Plaff-on! Collection for indoor and outdoor use. The compact structure surrounds an opal blown glass shade, with a small space between the glass and the ring that gives the diffuser a slightly floating appearance. It keeps the simple look of the Plaff-on! range, but gives it a more direct pendant format.

The pendant projects light downwards, making it useful over dining tables, kitchen worktops, counters, and outdoor seating areas. It can be hung on its own where one compact light is enough, or used in multiples for longer surfaces and larger spaces. The Black finish gives the pendant a stronger outline, while Rust Brown adds a warmer outdoor tone.

This LED pendant is dimmable via Triac dimming and has an IP65 rating for outdoor use. The neoprene cable helps protect the fitting in exterior conditions, and a garland accessory is available for connecting several lamps from a single light point. Most suited to dining tables, kitchen counters, workspaces, shop counters, patios, terraces, garden dining areas, restaurants, hotels, and outdoor seating spaces.

Please Note: The Marset Plaff-On! LED Pendant can be used with a garland accessory to connect several lamps from a single light point. Please contact us for more information and pricing.

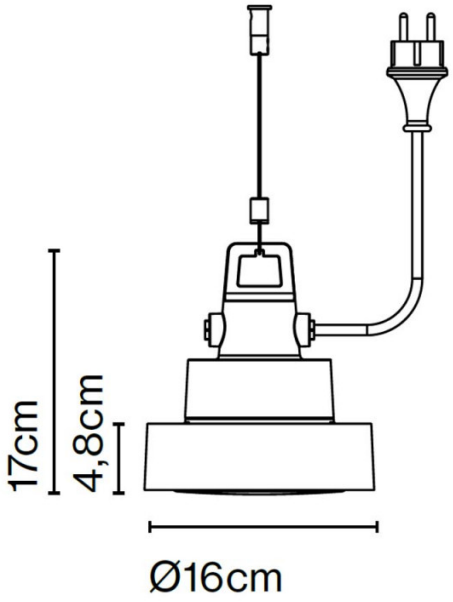

PRODUCT SPECIFICATION

Light Source: 8.47W, 2700K, 225 Lumens
