Marset Plaff-On! LED Outdoor Wall Light

Marset Plaff-on! LED Outdoor Wall Light is an IP65 outdoor wall light by Joan Gaspar, developed from the wider Plaff-on! Collection for exterior use. The fitting uses a perpendicular wall mount, with an opal blown glass shade held by a lacquered aluminium structure. The glass diffuser sits slightly away from the ring around it, giving the light the floating effect seen across the Plaff-on! range.

The light is cast mainly downwards, making it useful for paths, porches, patios, terraces, and outdoor seating areas. A small amount of light also escapes through the open top, creating a softer halo on the wall above the fitting. It can be used as a single outdoor wall light where one point of light is enough, or repeated along a wall for more even coverage.

Plaff-on! Outdoor is available in Black, Rust Brown, and White, each with the same opal blown glass shade. Its IP65 rating makes it suitable for outdoor use and bathrooms, while the integrated LED provides warm 2700K light. Most suited to entrances, garden walls, patios, porches, terraces, bathrooms, restaurants, hotels, and exterior seating areas where a compact wall light is needed.
