PRODUCT DESCRIPTION

Designer: Philippe Nigro

DCW editions Poudrier LED Wall Light

Designed by Phillipe Nigro for DCW editions, the Poudrier LED Wall Light is an elegant lighting solution; originally designed for bathrooms, but can be used a wide variation of interiors. Inspiration was drawn from a traditional powder case, with the key aspect of the lighting solution being the mechanical action of opening or closing it - this manoeuvre adjusts the light intensity, encouraging you to interact with Poudrier. The polished brass flap also acts as a pivoting mirror thanks to a visible hinge, and the illumination is diffused by a thick glass pane, throughout its depth. This glass pane features a wave effect, allowing for a smooth light dispersion but also resembling a fingerprint. Each Poudrier has an individual fingerprint and is completely unique.

DCW editions Poudrier Wall Light is a contemporary way to brighten up your bathroom, the personalisation of the light intensity allows you to adjust the ambience depending on your mood. The Poudrier can be displayed individually in smaller spaces or grouped together in larger rooms to create a composition on your wall.
