## PRODUCT DESCRIPTION

**Designer:** Tom Dixon

### Tom Dixon Melt LED Portable Lamp

Expanding the Melt collection, the Tom Dixon Melt Portable LED offers the same mesmerising glass effect, within a smaller and portable design. Part of the Melt's attractiveness is the contrast between when it is illuminated and when it is turned off; when turned on, the Tom Dixon Melt Portable is evocative of molten glass, the interior of a melting glacier or images of deep space. But when turned off, it becomes a reflected mirror-like surface.

As well as a gorgeous effect produced on the diffuser, Tom Dixon Melt LED Portable emits a warm and ambient glow across whichever surface you display it on. Thanks to the integrated dimmer on the base, you can easily personalise the lighting output and generate the ambience you prefer with a simple touch.

Available in a range of finishes, the Melt Portable can easily adapt to a range of contemporary interiors. It is a beautiful addition to both residential and commercial spaces and, thanks to the IP44 rating, can be used both indoors and outdoors. Perfect for bedside tables, lounge areas, kitchens, and even hallways in your home. Melt can also have a huge impact on environments in the hospitality sector, such as restaurants, bars, and hotels.

The newest addition to the Melt Portable Collection is the Melt Fluoro, a bright and bold new colourway that is guaranteed to draw the eye.

## PRODUCT SPECIFICATION

| | |
|---|---|
