PRODUCT DESCRIPTION

Designer: Estudi Manel Molina

Bover Noren LED Suspension

Inspired by the traditional Japanese fabric of the same name, Noren is a lightweight and decorative lighting solution for your space. The fabric was utilised in Japanese homes to divide areas, often replacing walls or windows in order to project an element of privacy; thanks to the sound-absorbing quality and large size of the Bover Noren Pendant, this light succeeds in the same way. Sound absorbing panels are fitted into the bottom of Noren, reducing noise distraction and providing a more calming ambience. This makes the pendants perfect for spaces where people are likely to gather, including restaurants, bars, cafes and in areas of your home where you are prone to hosting.

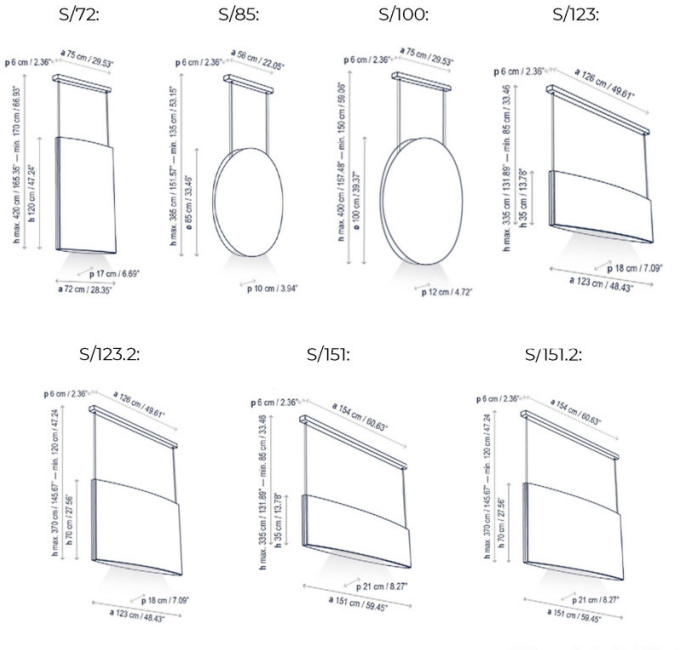

Another unique design by Estudi Manel Molina, the Noren pendant comes in a range of colours, shapes and sizes, offering the ability to adapt to a wide range of interior styles. Bover Noren casts a glare-free downlight upon the surroundings below, making it perfect for workspaces and areas that require functional light. These pendants can be displayed individually for residential spaces or clustered together, utilising various shapes, to create a gorgeous installation in commercial environments.

Each Bover Noren Pendant size is available in black, grey or terracotta.
