PRODUCT DESCRIPTION

Designer: Jordi Canudas

Marset Dipping Light LED Wall Light

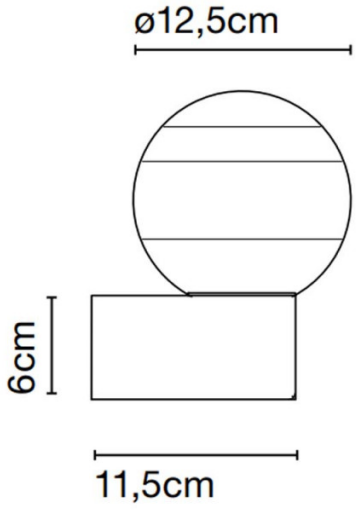

Marset Dipping Light LED Wall Light is a compact wall light with a glossy blown glass globe and a layered painted finish. Designed by Jordi Canudas, the Dipping Light came from a simple experiment, dipping a lit bulb into paint several times and observing how the colour changed the light. That process gives the glass its soft rings of colour, with the painted surface filtering the glow rather than covering it.

The wall version works well where a small fitting needs to add atmosphere without taking up much space. It can be placed beside a bed, along a hallway, in a living room, or used in a repeated line through a restaurant, café, or hotel corridor. When lit, the warm 2700K light is softened by the glass and brings a gentle colour effect to the wall around it. When switched off, the globe still feels considered and decorative.

The integrated LED gives a warm, softened light through the painted glass, with Triac dimming for adjusting the output through a compatible system. Finishes include White, Green, Amber, Burgundy, Chocolate, and Cream, all paired with a Brushed Brass structure. Most suited to bedrooms, hallways, living rooms, dining areas, and hospitality spaces where a small wall light needs to bring colour to the wall without taking up much visual space.

PRODUCT SPECIFICATION

Light Source:	5.68W, 2700K, 645 Lumens
IP Code:	20
Dimming:	Dimmable via Triac dimming.
Dimensions:	Diffuser: Ø12.5cm Depth: 11.5cm Base Height: 6cm
