PRODUCT DESCRIPTION

Designer: Jordi Canudas

Marset Dipping Light LED Ceiling / Wall Light

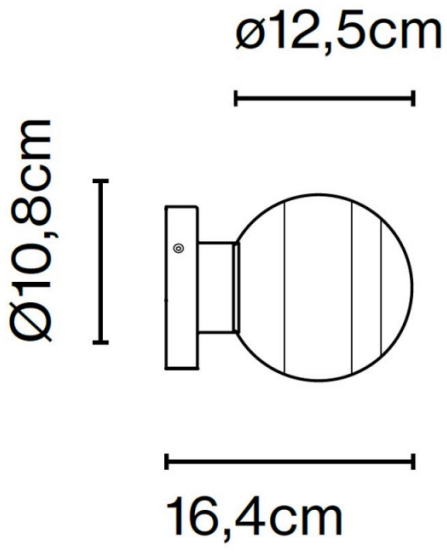

Marset Dipping Light LED Ceiling / Wall Light is a compact glass fitting by Jordi Canudas that can be installed on either the wall or ceiling. The design uses a glossy blown glass globe with layered paint, giving the light its ringed colour effect. The idea began with a lit bulb dipped into paint, so the colour is not just a surface detail; it is part of how the light is filtered.

The ceiling and wall version works well where a small fitting needs to bring colour to a room without taking over the space. It can be used beside a bed, along a hallway, in a living room, or repeated through a restaurant, bar, or hotel interior. When lit, the painted glass softens the warm light and gives the fitting a coloured edge. When switched off, the globe still reads as a small coloured object on the wall or ceiling.

This version is hardwired and includes an integrated LED with Triac dimming through a compatible system. It is available in White, Green, Amber, Burgundy, Chocolate, and Cream finishes, each paired with a Brushed Brass structure. Most suited to bedrooms, hallways, living rooms, dining areas, restaurants, bars, hotels, and interiors where a compact wall or ceiling light can add warm, coloured light.

PRODUCT SPECIFICATION

Light Source:	8.6W, 2700K, 765 Lumens
IP Code:	20
Dimming:	Dimmable via Triac dimming.
Dimensions:	Diffuser: Ø12.5cm Depth: 16.4cm Base: Ø10.8cm
