PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Bell LED Table Lamp

The Tom Dixon Bell LED Table Lamp was inspired by the bumper of vintage cars, and is an exercise in contemporary minimalism. This table lamp features an oversized dome shade that sits atop a weighted domed base to enhance stability and innovative LED technology. The structure is crafted from steel, and then coated with either a silver or black finish. The highly polished, reflective surface this creates allows Bell to take on a chameleon-like effect, mirroring the characteristics of its surroundings.

The curved shade of the Bell Table Lamp encloses a frosted diffuser and results in a soft and even diffusion of the LED light source, which is directed downwards to illuminate the surface below. Thanks to the integrated dimmer, located on the cable, you can easily adapt the light output to suit your environment and create your desired ambience. Tom Dixon Bell LED Table Lamp is perfect for contemporary homes that require a stylish touch.

Please Note: The on/off and dimmer functions of the lamp are now controlled by a switch on the cable (see image of cable and switch).

Please Note: Do not leave the Flouro finish in direct sunlight for prolonged periods as this will lead to colour fading on the product.

PRODUCT SPECIFICATION

Light Source:	12W, 3000K, 800 Lumens
IP Code:	20
Dimming:	In-line dimmer included on the cable.
Dimensions:	Height: 42.5cm Width: 28cm Cable Length: 250cm
