PRODUCT DESCRIPTION

Designer: Ciszak Dalmas

Marset Ambrosia LED Pendant

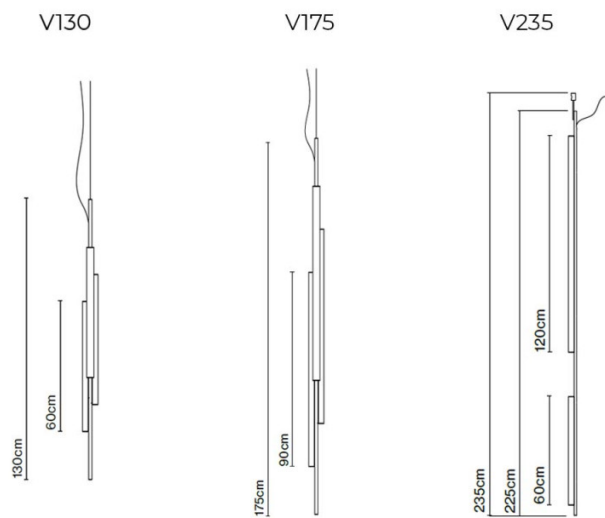

The Marset Ambrosia LED Pendant was designed by Ciszak Dalmas and consists of three light tubes placed at different heights, forming a sculptural ensemble. Ambrosia provides ample amounts of light despite its slender structure and when installed individually, it fills the space with light and warmth. This vertical pendant by Marset is available in three heights; 130cm, 175cm or 235cm, and all sizes can be via a ceiling rose or the floor plug.

This new addition to the Ambrosia collection allows you to create vertical lighting compositions, displaying the LED light individually for residential homes, or by combining different sizes in repetition to illuminate large spaces. Its slender design sets the perfect scene in any room, offering a totally new perspective for this flexible lighting system, which achieves maximum light expression with a minimalist structure.

The structure of Marset Ambrosia V is available in either black or matte gold and can also be supplied with varying colour temperatures upon request.
