PRODUCT DESCRIPTION

Occhio Sento Verticale LED Wall Light

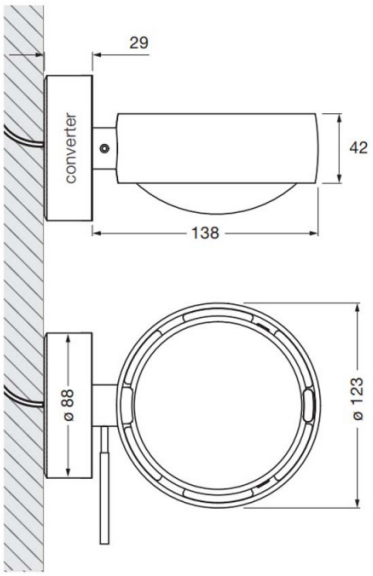

The Occhio Sento Verticale LED Wall Light maps a remarkable lighting design on your wall, whether displayed individually or in a cluster. The two lenses on either side of the structure boast a perfectly shaped diffuser that creates characteristic light cones on the wall. The structure can be rotated in order to direct the light emission, allowing you to personalise the lighting effect at any time.

The lighting output of the Occhio Sento Wall Light can be adjusted by touchless control, allowing you to dim the light source with a simple hand gesture, employing Occhio's passion for the 'Joy of Use'. Alternatively, you can choose to dim this wall light through trailing edge dimming. Either way you are guaranteed to always be in control of the light from your Occhio luminaire. The Occhio Sento Verticale LED Wall Light is a beautiful addition to bedrooms, living spaces, hallways and kitchens. It can also be utilised in commercial settings.

Please Note: An additional second light output is available, making it a dual emission wall light as shown in the lifestyle images. Please contact us for more information and pricing.
