PRODUCT DESCRIPTION

Designer: Christophe Mathieu

Marset Palosanto LED Outdoor Bollard Light

Marset Palosanto LED Outdoor Bollard Light is an adjustable bollard by Christophe Mathieu, designed for paths, gardens, terraces, and landscaped spaces. The spotlight can be moved along the stem and rotated by hand, making it easier to direct the light around planting, walls, walkways, or outdoor seating. Its aluminium construction and IP65 rating make it suitable for regular exterior use.

The shorter bollards make sense along path edges, low borders, and smaller planted areas. Taller versions can sit further into a garden or terrace where the light needs to reach a little more. The single spotlight gives one clear direction of light, while the double version can point two ways from the same stem. In Black, the fitting has a sharper outline against stone, gravel, planting, or brick.

The glare cell helps take the edge off the beam, which is useful when the bollard is placed near a path, border, or seating area. Use it to light a route through a garden, pick up the texture of a wall, or aim light into planting as it grows. Most suited to paths, planted borders, garden walls, terraces, hotel

Please Note: The Marset Palosanto LED Outdoor Bollard Light does not include a power supply. A 24V remote power supply must be ordered separately. The Bollard Light is also available in Rust Brown. Also, the Marset Palosanto LED Outdoor Bollard Light does not include a power supply. A 24V remote power supply must be ordered separately. Please contact us for more information and pricing.
