PRODUCT DESCRIPTION

Designer: Christophe Mathieu

Marset Palosanto LED Outdoor Wall Light

Marset Palosanto LED Outdoor Wall Light is a compact exterior wall light by Christophe Mathieu, made for directing light across outdoor walls, paths, planting, and architectural details. The small spotlight head can be rotated by hand after installation, so the beam can be aimed where it is needed. Its aluminium body is IP65 rated, giving the fitting the protection required for exposed outdoor use.

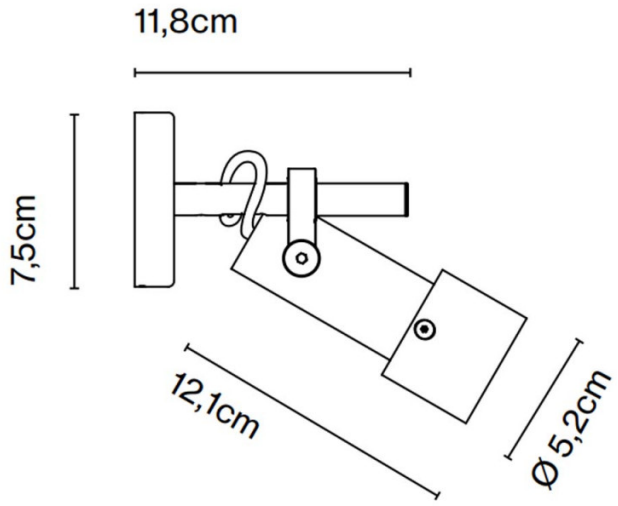

The glare cell included with Palosanto helps reduce the direct view of the light source. It also allows some light to reflect back through the fitting, giving a softer glow around the body rather than only a sharp beam from the front. The Black finish gives the wall light a clean, defined outline against brick, render, timber, or planting.

Palosanto suits smaller outdoor lighting jobs where a large floodlight would feel too strong. It can sit beside a doorway, along a garden wall, near a terrace, or be used to pick out a surface or feature in the garden. Most suited to outdoor walls, entrances, paths, patios, planted borders, restaurants, hotels, and exterior schemes where the direction of light needs to be set with care.

Please Note: The Marset Palosanto LED Outdoor Wall Light is also available in Rust Brown. Please contact us for more information and pricing.

PRODUCT SPECIFICATION

Light Source:	**With Glare Cell:** 2.1W, 2700K, 128.5 Lumens **Without Glare Cell:** 2.1W, 2700K, 174.37 Lumens
