PRODUCT DESCRIPTION

Designer: Phillipe Starck

Kartell Angelo Stone LED Floor Lamp

Kartell Angelo Stone LED Floor Lamp was designed by Philippe Starck for Kartell, a light which is greatly appreciated, reflected and given to the surrounding environment. The Angelo Stones light source for the lamp is not from above but from an LED positioned inside the stem which lights upward the shade, from which the high-tech lens reflections start. Thanks to the lampshade made from a single polycarbonate sheet, covered in a piece of fabric, the glare-free light is reflected even more uniformly.

Angelo Stone is available in three stunning metallic finishes: champaign, copper and titanium. These LED lamps make perfect reading lamps in any residential setting. The Angelo Stone is striking with an understated design which is a testament to its remarkable craftsmanship.
