PRODUCT DESCRIPTION

Designer: Oki Sato

Flos Sawaru LED Floor Lamp

Designed by Oki Sato, the Flos Sawaru LED Floor Lamp is crafted from two cylinder tubes - one hollow and acting as the base and one housing the LED light source. The hollow base can be manoeuvred up and down the body of Sawara and secured in place with a pin, this grants you the ability to personalise the angle of the lighting output and choose between a 25, 40 or 60-degree angle. Flos Sawara explores the theme of balance and boasts a minimalistic style, easily adapting to a range of contemporary interiors, and is available in either black or white painted die-cast aluminium.

The Flos Sawaru Floor Lamp features an integrated dimmer on the cable, which allows you to not only adjust the brightness of the lamp but also the colour temperature. This dim-to-warm feature grants you full control over the LED light source to personalise your environment as you wish. To generate an even more unique lighting solution, you can remove the base altogether and either place the Sawaru vertically for a direct uplight or flat horizontally on the ground to illuminate your flooring. Display the Flos Sawaru LED Floor Lamp in your living area, hallway, staircase, kitchen or dining space.
