PRODUCT DESCRIPTION

Designer: Benjamin Hubert

KDLN Frame Wall Light

The KDLN Frame Wall Light is a contemporary design with a minimalist, geometric aesthetic. It is characterised by its slim rectangular frame that creates a clean architectural outline. This understated design allows the light itself to become the focus, adding a sculptural element to the Frame. When illuminated, the Frame Wall Light casts a warm glow across the surrounding wall for soft, ambient lighting.

Designed to work as both a practical light and a decorative feature, the Frame Wall Light can be used in a variety of settings, including hallways, living areas, bedrooms, and hospitality environments. The geometric form complements contemporary interiors without overwhelming the space. Available in Chrome and White, the Frame Wall Light is a distinctive lighting feature that adds both character and sophistication to a wide range of spaces.
