Flos Kit Belt LED Suspension

The Flos Kit Belt LED Suspension is a feature piece; no matter where it is displayed, the unique structure is a demonstration of balance and flexibility, which provides both direct and indirect lighting. This linear suspension was designed by Ronan and Erwan Bouroullec. It is a sinuous line that creates harmony between the softness of the leather or fabric suspended from the ceiling and the rigidity of the aluminium. The softer aspects of the Belt contain the electrical connection, whilst the LED light sources are fitted into the solid base that slots into the leather or fabric straps.

The LED aspects of the Belt LED Suspension fit into the top and the bottom of the aluminium structure, providing a direct downlight and an indirect uplight. Although the Belt can be controlled as a whole, you also have the power to control each lighting element individually via remote control. Display the Flos Belt Suspension over your dining table, kitchen island, desk or communal workspace to make the most of its lighting effects and contemporary style.

The Flos Belt is available in leather (black, natural leather and green finishes) and fabric (grey olive and copper brown finishes). The suspension is powered at 48V, dimmable with a Casambi controller integrated inside the fixture. To manage the system, it is necessary to download the FLOS Control® powered by Casambi app.

PRODUCT SPECIFICATION

Light Source:	55.5W, 2700K, 1700 Lumens
IP Code:	20
Dimming:	Dimmable via Bluetooth with Casambi app.
Dimensions:	Width: 200cm Drop Height: 150cm
