PRODUCT DESCRIPTION

Designer: Esben Klint

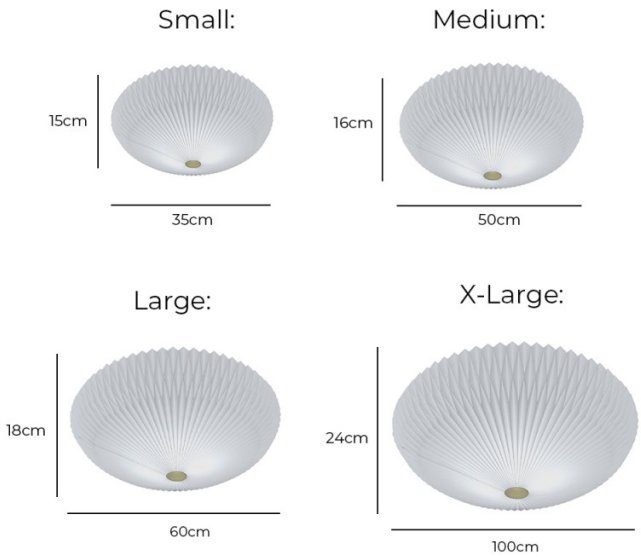

Le Klint Model 23 Ceiling Light

Le Klint specifically designed the Le Klint Model 23 Ceiling Light to illuminate spaces with low ceilings, such as hallways. Model 23 is a slender ceiling light, with sizes ranging from 35cm–100cm in diameter. The light is fitted against the ceiling or wall and provides even light distribution to the environment below. Staying true to Le Klint's work, the Model 23 features a hand-pleated paper shade that softly diffuses the light without obstructing the functionality. Brass detailing is used to add a touch of elegance to this simple lighting solution.

The four varying sizes ensure that Model 23 can adapt to a range of interiors, no matter how much space you have. This ceiling light is a beautiful addition to hallways, living rooms, bedrooms and even storage rooms.
