PRODUCT DESCRIPTION

Designer: Antoni Arola

Vibia Flamingo Mini LED Pendant

Vibia Flamingo Mini LED Pendant was designed by Antoni Arola. This family of lights pairs simplistic beauty with high-quality performance. The pendants have a deconstructed design which separates the LED light sources from layers of thermoplastic translucent diffusers to produce soft gradations of illumination. The uniquely shaped diffusers are available in a range of configurations, each LED portraying a spotlight which can be directed upwards or downwards to create a soft ambient effect.

Vibia Flamingo Mini Pendant looks spectacular in commercial settings such as receptions, offices, bars or restaurants due to the length of the structure. They could either be hung singularly or as a cluster for a more dramatic effect. There are four different configurations: 1575, 1580, 1585 and the 1590. The Flamingo Mini pendant is also available with Casambi control.
