PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Melt Cone Slim LED Floor Lamp

The Tom Dixon Cone Slim Floor Lamp is a minimalistic lighting solution comprising of the iconic [Tom Dixon Melt](#) shade, perched atop a slender structure and supported by a conical base. The Melt Cone Floor Lamp is created through the process of blow moulding and vacuum metallisation, utilising high-quality craftsmanship to compose a unique and mesmerising shade. When switched off, the shade is a highly reflective metallic orb - however, when switched on the head of the floor lamp resembles molten glass. Since its creation, this sleek floor lamp has evolved to include an opal version - which resembles a pearl instead of the usual molten effect. This rendition also emits a higher luminosity and is a perfect fit for more minimalistic interiors.

The Melt Cone Slim LED Floor Lamp is dramatic yet unobtrusive, guaranteeing to make a statement in your space without taking up too much room. The slender frame allows the Melt shade to be the main attraction, and with the choice of four different finishes the Tom Dixon Melt can adapt to a range of modern interiors. Display this floor lamp in your living space, dining room, hallway, or entryway. Similarly, in commercial settings, it asserts spaces such as restaurants, bars and hotels.

Tom Dixon has released the bronze variant in celebration of the Melt's tenth anniversary. This new finish exudes luxury and features more muted tones than the previous colourways, suiting a wide range of decors.

Please Note: Although the Tom Dixon Melt Cone Slim LED Floor Lamp appears to have no wires in the imagery, it is fitted with a 250cm cable and plug.
