PRODUCT DESCRIPTION

Designer: Foster and Partners

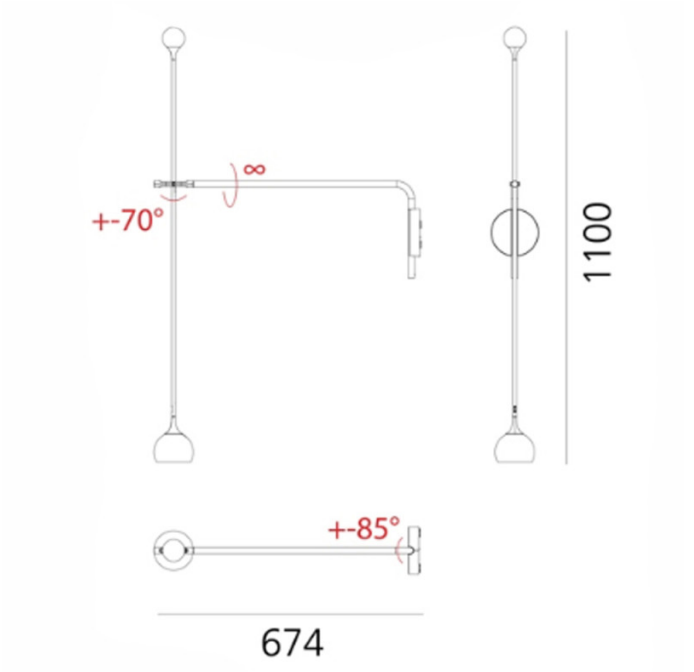

Artemide Ixa LED Arm Wall Light

The Artemide Ixa LED Arm Wall Light was designed by Fosters + Partners, who found inspiration in Alexander Calder's dynamic sculptures. The design interprets the idea of "elegant balance" through precision engineering. This Wall Light consists of an adjustable spherical head, rods and counterweights. It combines functionality, productivity and sustainability. Artemide and Foster + Partners share a profound approach to sustainable design. The adjustable arm allows Ixa to bring light to where it is needed, inviting you to interact with the object physically and adding a playful touch to the design.

The Ixa LED Arm Wall Light is a fun addition to offices, reading nooks, kitchens and even living spaces. Available in four finishes, this design allows you to choose between more neutral colours or a bolder yellow for more maximalist interiors or to add a burst of colour to minimalist spaces.

PRODUCT SPECIFICATION
