PRODUCT DESCRIPTION

Designer: YOY Design Studio

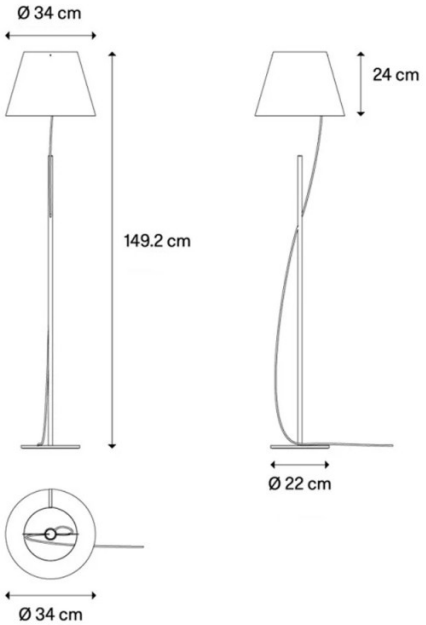

Lodes Hover LED Floor Lamp

Designed by YOY Design Studio, the Lodes Hover LED Floor Lamp is a minimalistic and unique lighting solution that can be used in both residential and commercial spaces. It consists of a lampshade that appears to be detached from the base, connected seamlessly by a single cable which runs through the stem. This design creates an illusion that the light source is almost weightless and floating in the air, like a balloon. All external technical functions have been carefully incorporated within the lamp's internal structure. The Hover Floor Lamp invites you to interact with the lamp, boasting an integrated dimmer on the upper end of the stem. This allows users to adjust the light with ease by touching the top of the stem.

The Lodes Hover Floor Lamp is crafted from a strong metal structure and a white paper and polymer shade. This shade effectively diffuses light, producing a cosy and warm illumination. This ambient glow is perfect for use in a living room, dining room, or bedroom. In public spaces, display the Hover Floor Lamp in restaurants, bars, or a hotel lobby to create a welcoming atmosphere.
