PRODUCT DESCRIPTION

Designer: Andrea Tosetto

Lodes Bugia LED Ceiling Light

The Bugia LED Ceiling Light is a contemporary light created by Andrea Tosetto for Lodes. The design features compact, circular forms available in three compositions: single, double, or triple. When illuminated, light is emitted from the centre to imitate the shine from a precious stone. Direct and indirect light strikes a harmonious balance as light is diffused both downwards and upwards to bathe the ceiling in a warm glow.

The Lodes Bugia Single is supported by a metal structure fixed to the ceiling with magnets, while the Double, Triple and Mega versions are supported by a round closure element in the same colour as the diffuser. Available in four sleek finishes: White, Black, Copper, and Chrome, the Bugia Ceiling Light suits minimalistic, contemporary spaces. Install in a living space, entryway, hallway, or bedroom for functional lighting that will add a touch of elegance to the room.

The Lodes Bugia LED Ceiling Light can also be supplied with a colour temperature of 3000K. Please contact us for more information and pricing.
