PRODUCT DESCRIPTION

Designer: Umut Yamac

Vibia Array Cylindrical Pendant

The Vibia Array Cylindrical Pendants are composed of strips of fine thread that are pulled taut between metal rings. The result is beautiful contemporary 3D spaces that produce a warm ambient illumination and make a statement without overwhelming the space they occupy. The LED light source is fitted within the bottom two rings, emitting light upwards through the fabric and also downwards for a more direct ambient glow onto the area below.

Designed by Umut Yamac, these pendants are available in a wide range of sizes and also offer you the choice between three finish options - Beige, Terra Red or Green. Each Vibia Array Pendant can be displayed individually or grouped together in varying sizes for a more dramatic lighting installation. Array is a great addition for residential and commercial contemporary spaces, the smaller models adding an elegant touch to dining spaces, kitchens, living areas and stairways, whereas the larger versions are perfect for restaurants, bars, shops and hotel lobbies.
