PRODUCT DESCRIPTION

Designer: Mario Alessiani

Axolight Float LED Portable Floor Lamp

Designed by Italian architect Mario Alessiani, the Axolight Float LED Portable Floor Lamp is a modern lighting solution that can adapt to almost any interior. The silhouette consists of a long, slender body that houses the iconic doughnut-shaped Float lamp head. Integrated LEDs produce a powerful yet glare-free downlight that illuminates the floor below. Created with portability in mind, the Float Floor Lamp requires no cables for a clutter-free and space-saving lighting solution. Its IP55 rating means it can be used in exterior settings, as well as interior, to illuminate your garden or terrace.

The Axolight Float Portable Floor Lamp features an integrated 5-step touch dimmer on the lamp head, offering further personalisation and allowing you to adjust brightness intensity to suit any mood. The rechargeable battery offers up to nine hours of use, depending on light output. If required, the battery can be replaced, adding to the lamp's longevity. The Float Portable Lamp can be displayed on the frame, suspended using the included cable and hook, or, thanks to the central hole underneath the shade, can be freely placed on any bottle to create a cosy and intimate atmosphere.

The Axolight Float Portable Floor Lamp is available in 15 finishes, including Yellow, Red, Green, Brown, and Grey. Contact us for more information.
