## PRODUCT DESCRIPTION

**Designer:** Ferruccio Laviani

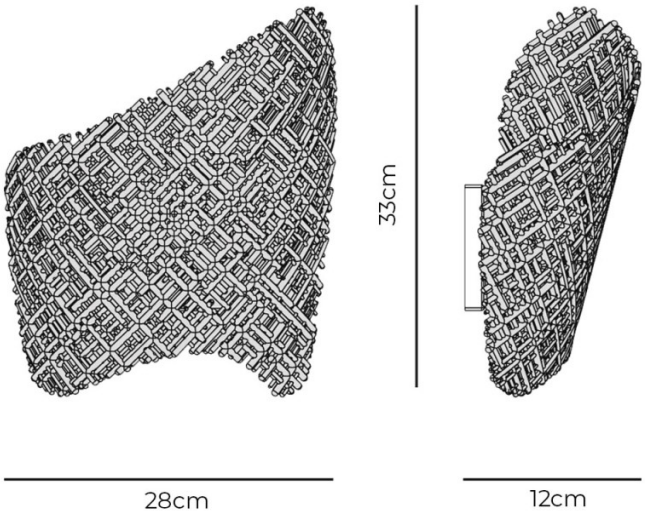

### Kartell Tea Wall Light

The Kartell Tea Wall Light is an abstract lighting solution, crafted from recycled ABS, although it appears to be crafted from ceramic. With this wall light, they have proven that it is possible to utilise modern-day sustainable materials to achieve a natural and fragile look. This results in Tea not only being durable and authentic but also eco-friendly. A perfect combination of functionality and sustainability.

Designed by Ferruccio Laviani, the shade aims to resemble a hand encapsulating the light source, with the illumination escaping through the irregular patterns that define it in a chiaroscuro effect, resulting in a creative play of shadows across your wall. The Tea Applique allows you to choose between four natural finish options, each providing a warm and inviting ambient glow. This makes the Kartell Tea Wall Light perfect for living areas, bedrooms, reading nooks and dining rooms. Tea by Kartell can not only blend into any modern interior but also enhance it.

## PRODUCT SPECIFICATION

| | |
