PRODUCT DESCRIPTION

Designer: Michele Groppi

Davide Groppi Magia LED Suspension Light

The Davide Groppi Magia is a horizontal suspension light that allows the user to personalise the silhouette by displaying individually or multiple tubes suspended one above the other. Magia consists of tubular shades housing an LED light source and suspended by thin, almost invisible wires. This suspension can be displayed with one light source or you can build a unique configuration consisting of numerous tubes stacked above each other at regular intervals.

The tubed shade of the Davide Groppi can also be easily rotated to provide either direct or indirect illumination, depending on which direction you wish the illumination to face. For this reason, the Magia LED Suspension is a sleek lighting solution for above dining tables and kitchen islands in residential properties or a unique way to illuminate communal workspaces or reception desks in commercial areas. For larger configurations, the Magia Suspension can also be a striking addition to stairwells and entryways.

The Davide Groppi Magia offers numerous canopy options, including a standard ceiling canopy or a recessed version. This product can also be supplied with a colour temperature of either 2700K or 3000K.

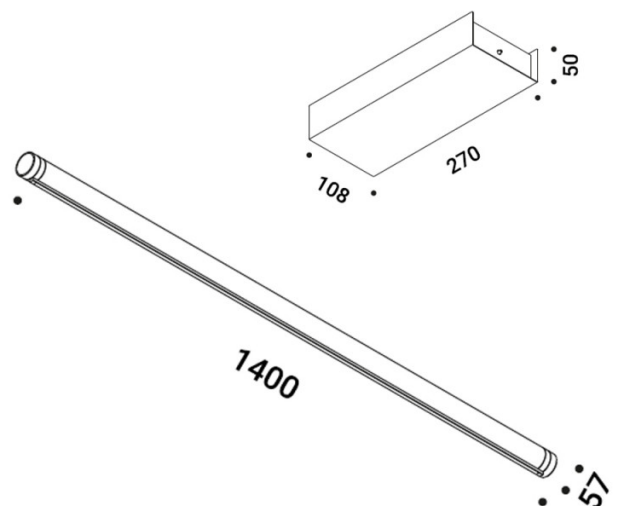

PRODUCT SPECIFICATION

Light Source: 19W, 2700K, 1272 Lumens
19W, 3000K, 1312 Lumens
